

I have XM radio and love it. Up until I got it I couldn't find anything worth listening to. Also here where I live the reception stinks. Not much to choose from. Well now I have anything I want and crystal clear to boot. I don't care for the National Association of Broadcasters censoring anything I listen to. After all I'm paying for it. It'd be no different than buying a car and someone else deciding the different things I would want on it. Thanks for listening. Just like I'm going to do now on my XM radio. Sincerely Joseph Kimmel
